“I established a Twitter account for my library - Tuscan School Library (K-5) - a few years ago. It has been very helpful in terms of promoting the library and all the activities that occur each week. (Some weeks/months I am more active than others!)”

School Libraries Provide:

- Safe Learning Environment
- Equal and equitable access to materials and technological resources
- Regular collaboration with teachers enhancing curriculum and NJ Student Learning Standards

Provide College and Career Readiness Skills

Building capacity for fundamental engagement with information with an emphasis on critical evaluation of sources and the investigation of diverse sources of information.

Necessary for students to be able to do college-level research.

As witnessed by a number of academic librarians, students are lacking these skills. [Vale Statement from Academic Librarians](#)

Librarians are Instructional Leaders

Students are not your only clients

SLMS work with faculty and staff as instructional leaders with regards to technology integration and the multitude of available resources.

Providing PD, lesson planning, SGO assistance and help creating all types of assessments.

Example of Information shared with District 3 Legislators:

Statistic: There has been an almost 10% decrease in the number of school librarians since 2011 in the Gloucester, Cumberland and Salem County schools, all areas that are served by District 3. For example, Logan Township and Elk Township School Districts have no certified school librarians, Franklin Township Schools have one school librarian for all four schools.

Research: Schools staffed by certified school librarians contribute to student learning and their critical thinking skills. These are skills needed for students to be competitive in the global economy.

Ask: Please support A4500 to require a specific ratio of SLMS.
